

Today, organizations need an effective way to provide their increasingly mobile workforce secure wireless access and management of their **Email & PIM (Calendar and Contacts)**. As organizations seek a solution, they are faced with a number of decisions. One decision is selecting the appropriate wireless device(s). Another is choosing the appropriate wireless network(s) to obtain the best support, coverage and economics for their organization's geographical requirements.

Most organizations logically prefer a single enterprise solution that will offer them support for a variety of wireless devices. Adopting a device and network independent solution provides an organization the flexibility to change devices or networks as technology improves. Many organizations are expanding their requirements for a wireless solution to include mobile wireless on voice and data networks as well as fixed wireless supporting all versions of 802.11x networks.

The NotifyLink On Premise Mobility Solution interfaces with Google providing secure, real-time synchronized **Email & PIM** to and from a variety of wireless devices including Palm, BlackBerry, Apple iPad, iPhone and iPod touch , *Symbian **Android and Windows Mobile based handhelds. Users have the comprehensive ability to compose, reply, forward, or delete their email while mobile on all these devices using just the NotifyLink On Premise Mobility Solution.

What Sets the NotifyLink On Premise Mobility Solution Apart?

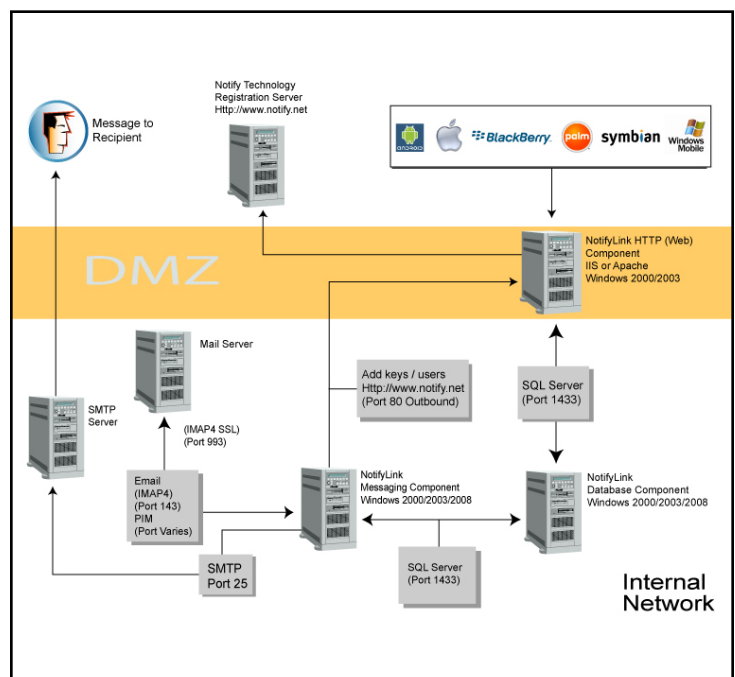

Unlike many other enterprise solutions, NotifyLink provides a single enterprise solution supporting virtually all Apple iPad, iPhone and iPod touch , Palm, *Symbian. **Android, Windows Mobile, and BlackBerry OS devices simultaneously over a variety of wireless networks: GSM/GPRS/EDGE/HSDPA, CDMA/1XRTT/EVDO and 802.11x. The NotifyLink On Premise Mobility Solution provides Over-the-Air synchronization of **Email & PIM** thus freeing users from being required to cradle their wireless devices in order to maintain synchronization.

With NotifyLink, all **Email & PIM** information will be stored safely behind an organization's firewall while all delivery of information to and from the wireless devices is encrypted utilizing either the TDES or AES encryption algorithms.

- Improved Administration Interface
- Simplified Device Registration
- Device Management Interface

IT Professional Benefits:

- Easy to Install & Configure
- Separate Web Based Administration for IT and End User
- All Data Stored Behind the Corporate Firewall
- End-to-End Encryption Supporting AES & Triple DES
- Enterprise Scalable System Architecture
- Simultaneous Support for Multiple Devices
- Supports a Variety of Wireless and Fixed Wireless (802.11x) Networks
- Configure, Add, Enable, Disable, Delete Users

Synchronization:

- Folder Mirroring
- Automatic Synchronization of Contact Changes from Server (read release notice as there are some performance concerns around this feature)
- Improved Email Synchronization of Deletes and Messages
- Marked as Read
- International Character Set Support via UTF-8 Encoding
- Global Contacts Remote Lookup

System Requirements:

NotifyLink:

The Enterprise Server requires three components to be installed - the SQL Database, Web Server and a Messaging Server. Requirements will vary depending on the component being installed. With NotifyLink's flexible architecture, these components may be installed to one server or may be distributed across multiple Servers. The components and their respective requirements are as follows:

- Microsoft Windows 2000/2003/2008 Server, Support for 32 & 64Bit Processors
- Support for Virtualization
- Microsoft Windows 2000/2003 Server
- Intel Pentium 4.0 processor or better
- 2GB RAM
- 10GB free hard drive space
- Microsoft SQL Server 7.0 or later (SQL Server 2005 Express may be used for smaller deployments)
- Microsoft Internet Explorer 5.0 or later
- APACHE HTTP Server version 2.0.48, 2.0.49, 2.0.50, 2.0.54 and 2.0.58
- Microsoft IIS 4.0 or later
- Port 80 or 443 inbound/outbound open
