

Notify Technology currently supports the Apple iPad, iPhone and iPod touch using either the NotifyLink On-Premise or On-Demand solutions. Corporate IT wants an effective way to provide their increasingly mobile workforce secure wireless access and management of their email, calendar, and contacts. Most organizations and businesses are seeking a mobility solution that will offer them support for their iPad, iPhone or iPod touch wireless devices on popular cellular voice and data networks (*Right now only offered on AT&T and several other international carriers*) as well as any 802.11x wireless networks.

The NotifyLink On-Premise and On-Demand mobility solutions provide secure, real-time synchronization of email, calendar, and contacts to and from the Apple iPad, iPhone or iPod touch wireless devices. With NotifyLink, users have the ability to compose, reply, forward, or delete their email while mobile, as well as open a variety of email attachment formats. Support for accepting or declining meeting invitations and remote access to their Global Address Book is also provided.

What sets the NotifyLink mobility solution apart?

The NotifyLink On-Premise and On-Demand Mobility Solutions provide Over-the-Air synchronization of email, calendar, and contacts freeing users from being required to cradle their wireless devices to the PC in order to maintain synchronization. NotifyLink provides a single enterprise mobility solution supporting the Apple iPad, iPhone and iPod touch over a variety of wireless networks such as GSM/GPRS/EDGE/3G-HSDPA or any 802.11x network.

On-Premise and On-Demand solutions utilize a "direct push" or "scheduled push" connection when connecting to the iPad, iPhone or iPod touch. With NotifyLink, all email, calendar, and contact information will be stored safely behind an organization's firewall while all delivery of information to and from the device is encrypted utilizing SSL. Should a user lose their iPad, iPhone or iPod touch, a remote wipe can be initiated to ensure

Apple iOS 4, iPad Wi-Fi + 3G now supported

- **Improved Security**
- **Sync your email, contacts & calendar**
- **IT management & control**

all information on the device is erased. With NotifyLink an administrator can require a password to be entered on the device ensuring the highest of security standards.

For more information on NotifyLink support for the Apple iPad, iPhone and iPod touch, please contact sales@notifycorp.com.

NotifyLink On-Premise Mobility Solution for the Apple iPad, iPhone and iPod touch

Email:

- Uses the iPad, iPhone and iPod touch native email client to send, receive, reply to and forward emails
- Folder Mirroring allows email folders from your mail account to be synchronized to the device
- Email filters, set on the NotifyLink server via the end user web client, filter mail sent to the device
- Attachment viewing is supported using the iPad, iPhone and iPod touch native viewers:
 - Emails with attachments can be forwarded
 - With the exception of picture files in the device's photo album and contacts, attaching a file residing on the device to an email is not currently supported
 - You cannot save a document file on the iPad, iPhone or iPod touch

PIM: (Calendar and Contacts)

- Interfaces to the iPad, iPhone and iPod touch native calendars and contact applications
- Synchronize calendar events in a configurable Look-Back/Look-Ahead range
- Multiple address books supported
- Remote Lookup (Global Address List) retrieves contact information from the customers LDAP directory provided the iPad, iPhone and iPod touch contact synchronization is enabled
- Receive and respond to meeting invitations
- Meeting invitations can be initiated from the device
- Current iPad, iPhone and iPod touch device limitations:
 - Task synchronization is not supported

Security:

- SSL encryption protocol for data-in-motion between the iPad, iPhone and iPod touch and the NotifyLink server
- Remote Wipe (enabled via the NotifyLink Admin Web)
- Require password on the iPad, iPhone and iPod touch (enabled via the NotifyLink Admin Web)
- Inactivity timeout (enabled via the NotifyLink Admin Web)
- Password Strength (enabled via the NotifyLink Admin Web)
- Minimum Password Length (enabled via the NotifyLink Admin Web)
- Wipe of Failed Unlock Attempts (enabled via the NotifyLink Admin Web)

Push Types:

- Direct Push (Push) and Scheduled Push (Fetch) options

NotifyLink On-Demand - No addition hardware or software required

NotifyLink On-Premise System Requirements:

The NotifyLink Enterprise Server requires three components to be installed: the SQL database, web client and a messaging engine. Requirements will vary depending on the component being installed. With NotifyLink's flexible architecture, these components may be installed to one server or may be distributed across multiple servers. The components and their respective requirements are as follows:

- NotifyLink version 4.6.2 or later
- Microsoft Windows 2003/2008 Server, Support for 32 & 64bit processors
- Support for virtualization (VM ware)
- 32-bit Intel Pentium IV processor or better
- 3GB RAM
- 10GB free hard drive space
- Microsoft SQL Server 2000/2005/2008
- Microsoft Internet Explorer 6 or later
- Supported Microsoft IIS versions: English versions 5,6 and 7
- Port 80 /443 inbound/outbound open
