

Notify Technology is proud to announce support for the Palm® Pre™ using either the NotifyLink On-Premise or On-Demand solutions. Corporate IT wants an effective way to provide their increasingly mobile workforce secure wireless access and management of their email, calendar, contacts and tasks. Most organizations and businesses are seeking a mobility solution that will offer them support for their Palm Pre wireless device on cellular and voice data networks (*at this time only on the Sprint® and Bell Canada networks*) and any 802.11x wireless network.

The NotifyLink On-Premise and On-Demand mobility solution provides secure, real-time synchronization of email, calendar, contacts and tasks to and from the Palm Pre wireless device. With NotifyLink, users have the ability to compose, reply, forward, or delete their email while mobile, as well as open a variety of email attachment formats. Support for accepting or declining meeting invitations and remote access to their Global Address Book is also provided.

### What sets the NotifyLink mobility solution apart?

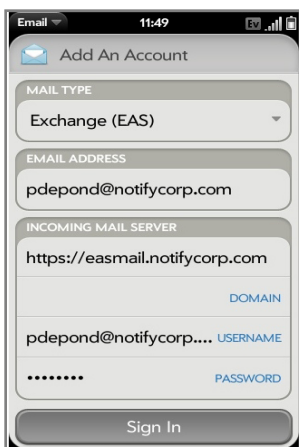

The NotifyLink On-Premise and On-Demand Mobility Solutions provide Over-the-Air synchronization of email, calendar, contacts and tasks, freeing users from being required to cradle their wireless devices to the PC in order to maintain synchronization.

NotifyLink provides a single enterprise mobility solution supporting the Palm Pre over a variety of wireless networks such as CDMA/1XRTT/EVDO, (*at this time only on the Sprint® and Bell Canada networks*) or any 802.11x network.

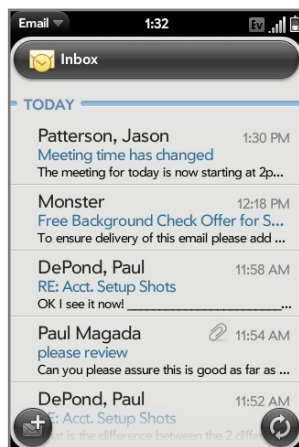

On-Premise and On-Demand solutions utilize a "direct push" or "scheduled push" connection when connecting to the Palm Pre device. With NotifyLink, all email, calendar, contact and task information will be stored safely behind an organization's firewall while all delivery of information to and from the device is encrypted utilizing SSL. Should a user lose their Palm Pre device,

a remote wipe can be initiated to ensure all information on the device is erased. With NotifyLink an administrator can require a password to be entered on the device ensuring the highest of security standards.

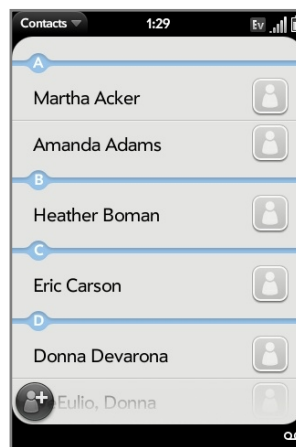

For more information on NotifyLink support for the Palm Pre, please contact [sales@notifycorp.com](mailto:sales@notifycorp.com).

## NotifyLink On-Premise Mobility Solution for the Palm Pre

---

### Email:

- Uses the Palm Pre native email client to send, receive, reply to and forward emails
- Folder Mirroring allows email folders from your mail account to be synchronized to the device
- Email filters, set on the NotifyLink server by using the end user web client, filter mail sent to the device
- Attachment viewing is supported using the Palm Pre native viewers for Microsoft Office™, Pdf and pictures

### PIM: (Calendar, Contacts and Tasks)

- Interfaces with the Palm Pre native calendar, contact and task applications
- Synchronize calendar and task events in a configurable Look-Back/Look-Ahead range
- Multiple address books supported
- Remote Lookup (Global Address List) retrieves contact information from the customers LDAP directory
- Receive and respond to meeting invitations
- Current Palm Pre device limitations:
  - Meeting invitations cannot be initiated from the device

### Security:

- SSL encryption protocol for data-in-motion between the Palm Pre and NotifyLink server
- Remote Wipe can be initiated by NotifyLink Admin Web for a lost or stolen Palm Pre
- Require password on Palm Pre (Enabled via the NotifyLink Admin Web)
- Inactivity timeout (Set on Palm Pre via Palm Pre Auto-Lock feature)

### Push Types:

- Direct Push (Push) and Schedule Push (Poll) options

---

## NotifyLink On-Demand - No addition hardware or software required

---

### NotifyLink On-Premise System Requirements:

The NotifyLink Enterprise Server requires three components to be installed: the SQL database, web client and a messaging engine. Requirements will vary depending on the component being installed. With NotifyLink's flexible architecture, these components may be installed to one server or may be distributed across multiple servers.

The components and their respective requirements are as follows:

- NotifyLink version 4.6.2
- Microsoft Windows 2000/2003/2008 Server, Support for 32 & 64bit processors
- Support for virtualization (VM ware)
- 32-bit Intel Pentium IV processor or better
- 3GB RAM
- 10GB free hard drive space
- Microsoft SQL Server 2000/2005/2008
- Microsoft Internet Explorer 6 or later
- Supported Microsoft IIS versions: English versions 5, 6 and 7
- Port 80 /443 inbound/outbound open
